3RD WORLD CONFERENCE ON QUALITATIVE RESEARCH

17 to 19 October 2018 // Lisbon - Portugal

ESEL - Lisbon School of Nursing

ABSTRACTS

António Pedro Costa
Cristina Rosa Soares
Lavareda Baixinho
Helena Presado
Óscar Ferreira

www.wcqr.info
Organizing Committee

Cristina Rosa Soares Lavareda Baixinho, Lisbon School of Nursing – Portugal (Coordinator)
António Pedro Costa, Aveiro University – Portugal (Coordinator)
Franciślêh Neri de Souza, Adventist Center University of São Paulo – Brazil
Helena Presado, Lisbon School of Nursing – Portugal
Lucija Vojnelka, University of Zagreb – Croatia
Óscar Ferreira, Lisbon School of Nursing – Portugal

Scientific Committee

Alberto Mesaque, Federal University of Minas Gerais – Brazil
Ana Amélia Carvalho, University of Coimbra – Portugal
Ana António, CeiED – Interdisciplinary Research Centre for Education and Development – Portugal
Ana Isabel Rodrigues, Polytechnic Institute of Beja – Portugal
Ana Maria Pinto Llorente, University of Salamanca – Spain
Ana Paula Sousa Santos, University of the Azores – Portugal
Ana Vanessa Antunes, Atlântica University – Portugal
Andrius Puksas, Mykolas Romeris University – Lithuania
António Carriro Moreira, University of Aveiro – Portugal
António Dias de Figueiredo, University of Coimbra – Portugal
Beverly Palmer – California State University, Dominguez Hills – United States
Branislav Radeljic – University of East London – United Kingdom
Brigitte Smit, University of South Africa – South Africa
Bruno Braga, Federal Institute of Education, Science and Technology of Brasilia – Brazil
Carl Vogel, Trinity College Dublin – Ireland
Carla Galego, CeiED – Interdisciplinary Research Centre for Education and Development – Portugal
Carolina Afonso, ISEG- Lisbon School of Economics & Management – Portugal
Catarina Brandão, Faculty of Psychology and Educational Sciences, University of Porto – Portugal
Cecília Guerra, University of Aveiro – Portugal
Celina Pinto Leão, University of Minho – Portugal
Daniela Schiek, Universität Bielefeld – Germany
Effie Kritikos, Northeastern Illinois University – USA
Elisabete Pinto da Costa, Lusófona University of Porto – Portugal
Elizabeth Pope, University of West Georgia – USA
Fátima Marques, ESEL – Lisbon School of Nursing – Portugal
Fernando Albuquerque Costa, University of Lisbon – Portugal
Francisco Carreiro da Costa, Lusófona University – Portugal
Gilberto Tadeu Reis da Silva, Federal University of Bahia – Brazil
Graeme Smith, Journal of Clinical Nursing – United States
Helder José Alves Rocha Pereira, University of the Azores – Portugal
Helena Noble, School of Nursing and Midwifery – United Kingdom
Helena Presado, ESEL – Lisbon School of Nursing – Portugal
Helga Rafael, ESEL – Lisbon School of Nursing – Portugal
Henrika Jormfeldt, Halmstad University – Sweden
Hong-Chi Shiau, Shih-Hsin University – Taiwan
Inês Amaral, Miguel Torga Higher Institute – Portugal
Isabel Alarcão, University of Aveiro – Portugal
Isabel Cabrita, University of Aveiro – Portugal
Isabel Huet, University of West London – United Kingdom
Isabel Pinho, University of Aveiro – Portugal
Jaime Ribeiro, Polytechnic of Leiria – Portugal
João Amado, University of Coimbra – Portugal
Jorge Remondes, ISVOUGA – Portugal
Kathleen Gilbert, Indiana University – United States
Katrin Niglas, Tallinn University – Estonia
Lakshmi B. Nair, Utrecht University – Netherlands
Lia Oliveira, University of Minho – Portugal
Lídia Oliveira, University of Aveiro – Portugal
Lubomir Popov, Bowling Green State University – United States
Lucíla Castanheira Nascimento, University of São Paulo – Brazil
Luis Sousa, Atlântica University – Portugal
Marcel Ausloos, University of Liege – Belgium
Marcos Teixeira de Abreu Soares Onofre, University of Lisbon – Portugal
Mari Carmen Portillo, University of Southampton – United Kingdom
Editorial

Qualitative and mixed research methods have been reaching important achievements throughout the academic world. However, there are still open challenges for multidisciplinary coherence, methodological focus, rigor and systematization towards the holistic integration and quality of research. The World Conference on Qualitative Research (WCQR2018) aims at being an important international discussion forum that sheds light on these and many other challenges in the area. The 3rd WCQR took place from 17th to 19th October 2018, at Lisbon School of Nursing, Portugal. For WCQR2018, the submission of scientific papers was encouraged and focused on i) Qualitative Research in Health (emphasis on the processes of research in the fields of Medicine, Nursing, Geriatrics, Gerontology, Psychology, etc.); ii) Qualitative Research in Education (emphasis on the processes of research in various areas of Higher Education, Basic Education, Assessment, Curriculum, Teaching, Teaching of Sciences, Languages, History, Technology, etc.); iii) Qualitative Research in Social Science (emphasis on the processes of research in the fields of Communication, Linguistics, Sociology, Anthropology, Business Administration, Marketing, Management and Economics, Political Science, etc.); iv)Qualitative Research in Engineering and Technology (emphasis on the research processes in the areas of Computer Science, Information Systems, Electrical Engineering, Software Engineering and Engineering Education).

The 3rd WCQR topics were organized under two major dimensions:

A) Fundamentals

1. Rationale and Paradigms of Qualitative Research (theoretical studies, critical reflection about epistemological, ontological and axiological dimensions).
2. Systematization of approaches with Qualitative Studies (literature review, integrating results, aggregation studies, meta-analysis, meta-analysis of qualitative meta-synthesis, meta-ethnography).
3. Qualitative and Mixed Methods Research (emphasis on research processes that build on mixed methodologies but prioritizing qualitative approaches).
B) Operationalization

1. Data Analysis Types (content analysis, discourse analysis, thematic analysis, narrative analysis, etc.).

2. Innovative processes of Qualitative Data Analysis (design analysis, articulation and triangulation of different sources of data – images, audio, video).

3. Qualitative Research in Web Context (e-Research, virtual ethnography, interaction analysis, internet latent corpus, etc.).

4. Qualitative Analysis with the Support of Specific Software (usability studies, user experience, the impact of software on the quality of research and analysis).

Besides regular paper presentations, WCQR2018 held two plenary sessions:

- "Transformative approaches: synergies, distinctions, strengths and current challenges", presented by Rosalind Edwards, from the University of Southampton (United Kingdom);
- "Using qualitative research methods to develop and evaluate complex interventions", presented by Adriana Henriques, Lisbon School of Nursing (Portugal);

And one discussion panel:

- "Innovations in Qualitative Methods and Topics" (National Centre for Research Methods):
  - "An introduction to NCRM’s qualitative research” Professor Rosalind Edwards (University of Southampton)
  - "Researching families and sustainability” Professor Lynn Jamieson (University of Edinburgh)
  - “A skills audit for participants: interactive activity”
  - "Big data, qualitative style: a breadth-and-depth method for working with large amounts of secondary qualitative data” Professor Lynn Jamieson (University of Edinburgh) and Professor Rosalind Edwards (University of Southampton)

Covering the large scope of Qualitative Research themes and issues, the World Conference on Qualitative Research aims to be a platform for the exchange of ideas, innovative solutions, perspectives and research results regarding the field, both in academic and corporate contexts. To that end, we dedicated the first day to the use and development of Digital Tools to support research. Digital Tools Day held two plenary sessions:

- "Mindsets for harnessing digital tools in qualitative and mixed-methods analysis: the Five-Level QDA® method”, by Christina Silver, from the University of Surrey (United Kingdom);
- "Text Mining to Improve Qualitative Data Analysis of Large Document Collections”, presented by Luís Paulo Reis, from the University of Porto (Portugal).

And four demo sessions:

- "DiscoverText: Power Tools for Human & Machine Learning", by Stuart Shulman (United States of America);
- “Introduction to ATLAS.ti 8 Windows: Tools for Digging into your Qualitative Data”, by Neringa Kalpokaite and Ivana Radivojevic (Germany);
- “How happy are your clients? webQDA as a tool for assessing customer satisfaction”, by Jaime Ribeiro (Portugal);
- "User Experience Evaluation", by Sónia Sousa (Estonia).
Most of the abstracts are published as a complete paper and can be found in the WCQR2018 Proceedings, in Springer – Series Advances in Intelligent Systems and Computing, in The Qualitative Report, in FRONTEIRAS: Journal of Social, Technological and Environmental Science, in Revista de Ciência e Saúde Coletiva, in Revista Brasileira de Enfermagem and in Journal of School of Nursing – University of São Paulo.

The entire process of research, revision and edition is the work of several collaborators and specialists. Therefore, a very well deserved and sincere word of thanks to all those who, directly or indirectly, contributed to the organization of the 3rd World Conference on Qualitative Research (attendants, authors, committees, partner institutions, sponsors, journals, etc.). A special thanks to the Lisbon School of Nursing, for providing the venue and the human resources that allowed this 3rd WCQR to happen. We believe that all these efforts are a form of promoting the expansion, integration and quality of qualitative research.
